The Napoleonic Influence

Impelled by the needs of a country temporarily cut off from West Indian cane sugar, Napoleon set in motion a new industrythe production of sugar

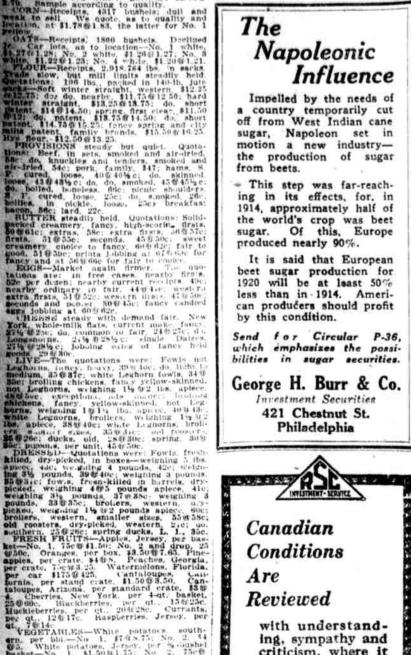

- This step was far-reaching in its effects, for, in 1914, approximately half of the world's crop was beet sugar. Of this, Europe produced nearly 90%.

It is said that European beet sugar production for 1920 will be at least 50% less than in 1914. American producers should profit by this condition.

Send for Circular P-36, which emphasizes the possibilities in sugar securities.
